Find the measure of the arc or angle indicated. Assume that lines which appear tangent are tangent.

1)

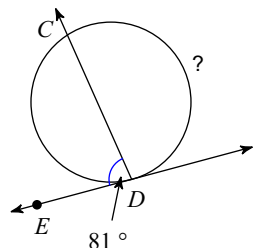

Solve for  $x$ . Assume that lines which appear tangent are tangent.

2)

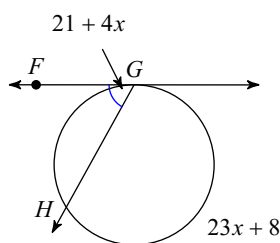

Find the measure of the arc or angle indicated. Assume that lines which appear tangent are tangent.

3)

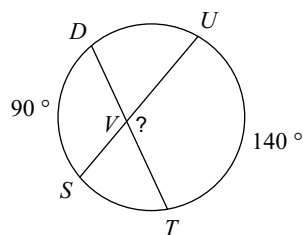

Solve for  $x$ . Assume that lines which appear tangent are tangent.

4)

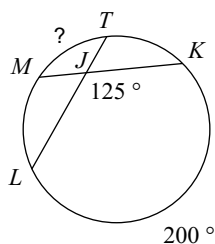

Find the measure of the arc or angle indicated. Assume that lines which appear tangent are tangent.

5)

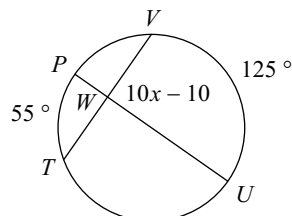

6)

Solve for  $x$ . Assume that lines which appear tangent are tangent.

7)

8)
