

AP CALCULUS AB

DR. PAUL L. BAILEY

Lesson 0510

Sunday, May 10, 2020

Information from the College Board

The AP Calculus AB online exam is scheduled for Tuesday, May 12, at 11:00 AM Pacific Daylight Time, which is the same as Mountain Standard Time, which is also known as Constant Arizona Time. Students will have 25 minutes to read and respond to Question 1, and then 5 minutes to upload their response. After uploading the response to Question 1, students will have 15 minutes to respond to Question 2, with 5 additional minutes to upload their response to Question 2. Once their response to Question 1 has been submitted, they cannot go back to it.

- Practice the framework for the actual AP using this exam demo.
- Review the required and recommended resource list.
- Carefully read the AP Testing Guide for 2020.
- View AP videos at AP Video Series.

(NEW) I have posted a link to the AP Checklist.

Print one of these *for each of your AP's*, and physically fill it out.

Today's assignment

- Please work through H0510 in document HCalABx0510.pdf. This contains two problems from recent years that we have not gone over yet. I will go over these problems with you tomorrow, Sunday May 11, 2020, at 1 PM.
- Please review E0506, reformatted for ease of use in ECalABx0406.pdf. I suspect this is as close as we will get to an idea of how this year's test will be formatted, so double check that you understand as much of it as you can.
- Please take a look at E0508, reformatted for ease of use in ECalABx0408.pdf. They call this "salad", maybe it should be "tossed salad". We will go over this Monday, if you have that much ambition.
- I reopened Q0506 on AP Classroom, if you haven't finished it and would like more feedback, you may finish it now.
